

Center for Business and Computer Science

Don't just prepare for the future, create it

Our graduates are intrapreneurs, entrepreneurs, founders, analysts, and innovators ready to take on exciting careers in new areas of human enterprise at some of the most in-demand companies in the world—or invent their own.

We foster the creativity of our majors by encouraging intradisciplinary collaboration, promoting academic curiosity, and problem-solving leadership, with an innovative approach. We encourage our students to think deeply and ethically in their field.

Our students are ...

Curious, creative learners
Business minded and technologically oriented
Innovators and unconventional thinkers
Proactive agents of change
Collaborators and future leaders

What you can study:

- Computer Science
- Business Administration
- Mathematics
- Stand-alone minors including Management Information Systems and Sport Studies.

What you'll do: Examine the rapidly evolving intersection of business, computer science, and math. Hone your quantitative and qualitative skills to develop your creative talent for innovation, and cultivate an agile, business and entrepreneurial mindset.

Where you'll learn:

- Tech Labs and Makerspaces – innovative areas for prototyping, equipped with 3D printers, laser cutters, and low-resolution prototyping materials and tools
- Redesigned School of Government facilities including boardroom style settings
- Throughout St. Louis' thriving business and entrepreneurial communities

Unique learning opportunities:

- Assignments simulating real-life scenarios to prepare you for your future.
- Up-to-date curriculum that goes past academic textbooks and focuses on the application of the concepts in your field of study.
- Participate in napkin stage Idea Bounce competition and shark-tank style events.
- Attend regional discipline focused events in the St. Louis region and visit local companies deepening professional knowledge and honing networking skills.
- Work 1:1 with a faculty coach to start shaping your own company

2 Center for Business and Computer Science

- Participate in regional events competing against other regional institutions
- Receive career support to polish your skills as you apply to internships and jobs.
